Professional Summary

Master of Computing (Artificial Intelligence) graduate from Curtin University, awarded Distinction and two Dean's Letters of Commendation for academic excellence. Combines professional experience as an SAP ABAP Developer at Accenture with practical experience developing and evaluating deep learning models for ECG-based cardiovascular classification. Skilled in Python, PyTorch, data preprocessing, ensemble modelling and model evaluation.

Education

- Master of Computing | Major in Artificial Intelligence
Curtin University, Perth | 2024–2026
Graduated with Distinction | Course Weighted Average: 82.6%
- Bachelor of Engineering | Electronics and Communication
L.D. College of Engineering, Ahmedabad, India | 2018 – 2022
Graduated with Distinction | CGPA: 9.11

Work Experience

Woolworths | November 2025 - Present

Position/Title: Store Team Member - Online Department (Part-time)

Responsibilities:

- Pick and pack online customer orders accurately within required timeframes.
- Collaborate with team members to meet order deadlines and maintain smooth daily operations.
- Assist customers with product enquiries and locating items in store.

Optus | October 2024 - June 2025

Position/Title: Retail Sales Associate (Part-time)

Responsibilities:

- Processed POS transactions, bill payments, device upgrades and account activations.
- Upsold mobile plans, accessories and insurance to support monthly sales targets.
- Resolved customer complaints to support customer satisfaction and retention.

Accenture Solutions Pvt Ltd | December 2022 - July 2024

Position/Title: SAP ABAP Developer (Packaged App Development Associate)

Responsibilities:

- Collaborated with senior ABAP developers and clients to support the design, development, testing and implementation of custom SAP solutions.
- Developed ABAP reports, function modules and OData services based on business requirements.
- Performed data archiving and purging activities in production systems.

Projects

Explainable AI for Cardiovascular Disease | August 2025 - May 2026

- Built a preprocessing pipeline for 63,851 ECG records across three datasets, mapping diagnoses into 19 SNOMED CT classes and creating train, validation and test splits with data leakage checks.
- Benchmarked seven ECG model families and developed a weighted Ribeiro CNN, CE-SSL and HuBERT-ECG ensemble, achieving 0.964 macro AUROC and 0.710 macro AUPRC on 9,578 held-out ECG records.
- Prepared a FastAPI inference package with validation-selected decision thresholds, input checks and versioned model artefacts for integration with the CardioMobile backend.

AI-Powered Chest X-ray Disease Detection System | March 2025 - May 2025

- Developed convolutional neural network models for thoracic disease classification and object detection in chest X-ray images.
- Integrated DICOM processing, Grad-CAM visualisations, bounding box detections and structured medical report generation into an analysis pipeline to support clinical review.

Tuberculosis Detection Using Machine Learning | January 2022 - April 2022

- Implemented Random Forest, Support Vector Machine and Logistic Regression models to detect tuberculosis from chest X-ray images.
- Combined model predictions using voting and weighted averaging ensemble methods and developed a Flask web application for doctors and patients.

Skills

- Programming: Python, SAP ABAP
- AI and Machine Learning: PyTorch, deep learning, convolutional neural networks (CNNs), multi-label classification, ensemble modelling
- Data Preparation and Evaluation: Data preprocessing, class-imbalance handling, model evaluation, decision-threshold tuning
- Cloud and Databases: AWS foundational concepts, relational database concepts (RDBMS)
- Professional Skills: Teamwork and collaboration, problem-solving

Achievements

- Received two Dean's Letters of Commendation from Curtin University's Dean of Science and Engineering for outstanding academic performance in Semester 2, 2024 and Semester 1, 2025.
- Awarded first place at Kaizen 2022 for the final-year project, with the award presented by Jitu Vaghani, then Education Minister of Gujarat.

Personal attributes

- Punctual and dependable, with the ability to prioritise tasks, meet deadlines and work effectively under pressure.
- Adaptable and eager to learn, with a proactive approach to developing technical skills, adopting new technologies and adjusting to new work environments.
